Bengaluru, IN https://gandharp.xyz
https://github.com/jinchuuriki91

SKILLS

Programming Languages: Python Java 8 Javascript SQL

Web Development: Angular React HTML CSS

Frameworks: Django Flask Dropwizard

Cloud computing platforms: AWS DigitalOcean Heroku

EXPERIENCE

Member of Technical Staff 2

Fyle

📅 Sep 2019 – Sep 2020

📍 Bengaluru, IN

- Worked on implementing Customer requested features into the platform
- Got exposure to AngularJS for WebApp and Dropwizard a Java framework for building REST APIs
- Hands-on experience with building microservices using Docker
- Wrote performant SQL queries for retrieving API response from resources
- Wrote Design Docs for the feature being implemented, this was a good learning experience
- Built a slack bot for Fyle platform so users can interact from Slack itself
- Worked on Gmail Add on built using Google App Script which helped users to add expenses from Gmail

Software Engineer

Reckonsys Tech Labs

📅 Dec 2018 – Aug 2019

📍 Bengaluru, IN

- Assigned to a project building a Logistics management SaaS platform
- Primary role was to plan and execute the implementation
- This included communicating with the client wrt project requirements, stages of deliverables and scale of usage
- Implemented using Angular, Django and PostgreSQL
- Led a team of 4 engineers
- Architected database schema and infra setup for production and testing
- Worked with Django to build REST APIs and Angular for WebApp

Full Stack Developer

Finesse Digital

📅 Oct 2018 – Nov 2018

📍 Remote

- First exposure to working as a remote developer for a Singapore based startup
- Mostly worked on backend REST APIs in Django framework
- Included writing automated test cases through pipelines

Software Engineer

InTouchApp

📅 Jan 2016 – Oct 2018

📍 Pune, IN

- Started off as a Front End developer for first 6 months but due to my interest in the Python started working with Backend Team resulting in a Full Stack experience
 - As a Front End developer I've worked on InTouchApp WebApp and HTML email templates
 - As a Backend developer I've worked extensively in Django 1.9, tasks included creating APIs, writing tests, database schema architecture and monitoring
 - Built an analytics internal tool using a time series database called InfluxDB
 - Integrated client analytics SDK tool Countly with InfluxDB, no library out does this
 - Implemented an incremental backup script for our InfluxDB arch since Open source version of above is void of it
 - Written Chef recipes AWS EC2 Setup and Configure
 - Setup Bitbucket pipelines for automated testing upon merge of a feature branch
 - Web crawlers for mining data for InTouchApp features ... This was fun! :)
-

Front End Engineer

Leova

📅 Jul 2015 – Dec 2015

📍 Hyderabad, IN

- Built web interface and custom css grid for Leova Flight API developer console
 - Javascript wrapper for searching flights on Kayak, Expedia and Hipmunk
 - Demo Chromecast app using Leova Flight API
 - Leova forum for platform users to post Q&A regarding Leova Flight API
 - Built analytics tool for Leova Flight API
 - Web scrapper to extract food items data from eat24.com
 - Python script to organise the scrapped data for Leova Food API
 - Virtual File System for faster web development on Google App Engine
-

Intern

WeChat

📅 Jul 2014 – Sept 2014

📍 Pune, IN

EDUCATION

B.E. in Computer Engineering

Maharashtra Institute of Technology, Pune

H.S.C.

RCF Jr. College, Alibag

S.S.C.

St. Mary's Convent School, Alibag
